Improve data protection

....

Enhance remote operations

....

Maintain regulatory compliance

Redact, mask & obfuscate confidential data in custom business applications & documents with **Mareo.**

⊚Mareo

An easy to implement industry agnostic digital platform leveraging the power of AI to mask, obfuscate and redact user-level role based data in real time. Mareo can be:

Implemented for processes supported by vendor partners or internal employees

Installed on standalone laptops/ desktops or remote desktops

Deployed on-premise or on cloud

A platform for client applications, documents, images and websites, with no integration needed with client native applications. Mareo masks PII user-level role based data in real time & has several unique features:

Complete / partial / distributed masking abilities

Configurable modules for creating/ editing redaction rules by business SMEs

Added security controls to prevent fraud from unauthorized external applications on user machines

Business Value

Data Protection
User role triage using distributed protection of PII data sets
Security controls to prevent fraud from unauthorized external applications on user machines

Business Continuity
Enabling employees and vendor partners to operate from anywhere, anytime

Independent of your applications
Only a test user creation required for configuration
No integration with your native systems

Quick implementation & simple configuration
Mareo is hosted on a server provided by the client
Configuration module available for creating/ editing redaction rules by business SMEs
